

# DEIONIZED WATER PRISTA®

## AUTOMOTIVE FLUIDS

### Description and Application

**Deionized Water Prista®** is used for dilution of automotive coolants/antifreezes and windscreen wash fluids, to top-up batteries and steam irons. The use of deionized water reduces scale formation caused by hard water and prevents ingress of mineral components such as chlorides and sulphates which can accelerate the corrosion of aluminum and iron metals. This water is not suitable for drinking and nutritional purposes!

### Typical Characteristics

Parameter	Test Method	Typical Value
Appearance	Visual	Transparent liquid
Color	Visual	Colorless
Relative Density at 20°C	EN ISO 3675	0.998
Electrical Conductivity at 25°C, mS/m, max	EN ISO 3696, s.7.2	0.5
pH value at 25°C	EN ISO 3696, s.7.1	6.0

Important note: typical data values do not constitute a specification but are an indication based on current production and can be affected by allowable production tolerances. The right to make modifications is reserved.

### Health, Safety and Handling

Based on current available information, this product is not expected to produce adverse effects on health when used for the intended application.
